

The Last Supper without Queuing: Now in Five Languages

Topguide24.com expands its product portfolio and available languages

Berlin, April 2016: Whether after work, on holiday, or at the weekend, your free time is a scarce resource and yet should help to make many wishes come true. It's a trend lately to plan excursions in advance, pre-order tickets, and schedule your weekend. Topguide24.com is there to help at 4,200 destinations with 60,000 different activities, and now even in five languages.

Topguide24.com is the world's largest meta-search engine for comparing excursions, tours, and activities at more than 4,200 destinations. Enrich your holiday with adventures and experiences such as classic hop-on/hop-off bus tours to going sledging with the huskies in Tromsø. But you can even have adventures closer to home, like heading to a salt cave near Munich or touring Hamburg's Schanze quarter.

Simply enter your destination, click Search, and Topguide24.com will list available tours and activities, including prices. In addition to German and English, the site's now also available in French, Spanish, and Italian. This will help to develop other markets in Europe and also beyond, especially with the English- and Spanish-language options.

"The demand for organised tours and excursions is growing. Many want to experience something special when on holiday. Even just pre-ordering tickets for activities makes your holiday nice because it saves standing in queues. We recently got a booking confirmation from a partner entitled The Last Supper without Queuing, which we found rather amusing. It also shows how well holidaymakers can now organise their trips in advance by going online", says founder Patrick Schulz.

The company was founded two years ago. Starting with information for 1,500 destinations, the portfolio has now expanded to include additional partners at some 4,200 destinations. Users can compare prices in the comfort of their home or even after they arrive and pre-order tickets through the site. The search engine provides search results in German, English, French, Spanish, and Italian. The offers are also available as the iGuiding app.

About iGuiding:

The meta search engine www.topguide24.com currently offers excursions, tours, activities, and the ability to pre-order tickets for more than 4,200 destinations worldwide. The engine is also available as a free, no-ads app in German and English. The Berlin-based company was founded in 2015. Founder Patrick Schulz works with a team of freelancers. He has more than ten years' experience in the online travel industry.
